Profile summary

I build secure, scalable, high performance **SaaS applications** for startups, founders, and product owners. I combine AI powered solutions, **rapid prototyping**, and focused MVP development to deliver investor ready SaaS products **in weeks** rather than months. I specialize in end to end product delivery from concept and architecture through deployment and release, with particular attention to security, performance.

→ Core competencies

- Full Stack development and system design
- SaaS architecture and MVP delivery
- AI integration and automation for product features
- Authentication and application security
- Payments integration and subscription management

→ Technical skills

- Frontend: Next.js, React, Tailwind CSS, UI libraries
- Backend and databases: Supabase, Firebase, serverless patterns
- DevOps and deployment: Git, GitHub, Vercel, Cloudflare
- AI and automation: API based LLM integration, data driven feature design
- Other: Analytics, A B testing, SEO best practices, payment gateways

→ Professional experience

~ Full Stack Developer

January 2025 to Present | SaaS MVP Developer

- Lead end to end development of investor ready SaaS MVPs for early stage startups and founders.
- Define MVP architecture, implement core features, and integrate AI driven components to accelerate user value.
- Implement secure authentication flows, role based access, and payments integration.
- Manage CI CD workflows and production deployments using Git, GitHub, and Vercel.
- Work directly with founders to translate business goals into product roadmaps and rapid prototypes for investor demos.

~ Website Developer

January 2024 to December 2024 | Business Websites

- Designed and built custom responsive websites tailored to client brand identity and target audiences.
- Focused on performance optimization, accessibility, and conversion oriented UX.
- Implemented on page SEO and technical improvements to improve organic visibility.
- Collaborated with stakeholders to deliver projects on schedule and within scope.

~ SEO Specialist

September 2023 to December 2023 | Performance Optimization

- Conducted keyword research, on page optimization, and technical SEO audits.
- Implemented data driven content and structural changes to improve search visibility and user engagement.
- Provided actionable recommendations to content and development teams to align SEO and product goals.

→ Education

Business Administration(HR), Government College University Fsd | 2022

Computer Fundamentals & Applications, Emerson Tech Institute | 2021

Intermediate in Economics, Millat Degree College, Faisalabad | 2020

→ Certifications

• AI Fluency and Foundations - Claude | 2025

• Conversion Rate Optimization - Udemy | 2025

• Responsive Web Design - freeCodeCamp | 2025

→ Selected strengths and approach

- **Product focused development:** I prioritize features that validate user demand and investor interest.
- **Speed with quality:** Rapid prototyping while maintaining security and performance standards.
- **Data driven decisions:** use analytics and user feedback to guide iteration.
- **Collaboration:** Clear communication with founders, designers, and stakeholders to align product and business outcomes.
